

Tiny Doctors Tech Specifications

(UPDATED: APR 2026)

Summary

Tiny Doctors (T.D.) is a short, one-act, highly adaptable & portable work aimed at primary school-aged children. Originally devised by *Happy Labs* for the wider Fringe circuit, *T.D.* can be performed in large and small spaces, either in Proscenium or Thrust.

The show consists of two actors, one keyboard, two headset mics and small set pieces and props. Any equipment provided by either the venue or artist is listed below. We have a technician/operator for all QLab audio, but will require a house venue technician during bump-in for lighting plotting assistance (basic washes/blackouts and house lighting) and general venue queries.

BASIC SHOW INFORMATION

Run time: 1 Act, 40mins, no intervals

Touring party size: 2 actors, 1 Technician

Theatre formats: Proscenium or Thrust, adaptable to venue specifications.

Bump in time: 1 hour

Bump out time: 0.5 hour

First possible performance after bump in: 0.5-1 hour following tech

Maximum performances per week: 2 shows x 5 days per week (10 total)

Minimum break between shows: 50 mins
